

Nuclear Medicine Technology Program

Job Placement Rates Six Months Post Graduation

Cohort Graduation Year	Number of Graduates	Graduates Employed as Nuclear Medicine Technologist	Continuing Formal Education
2022	6	100%(6)	0
2021	5	100%(5)	0
2020	4	100%(4)	0
2019	7	100%(7)	0
2018	5	100%(5)	0
2017	3	100%(3)	0
2016	6	100%(6)	0
2015	7	100% (7)	0
2014	3	100% (3)	0
2013	4	50% (2)	0
2012	7	100% (7)	0
2011	5	40% (2)	20% (1)

Job Placement Rates – 3 year period

Cohort Graduation Year	Number of Graduates	Graduates Employed as Nuclear Medicine Technologist	Continuing Formal Education
2020 - 2022	15	100%	0
2019 - 2021	16	100%	0
2018 - 2020	16	100%	0
2017 - 2019	15	100%	0
2016 - 2018	14	100%	0
2015 - 2017	16	100%	0
2014 - 2016	16	100%	0
2013 - 2015	14	86%	0
2012 - 2014	14	86%	0

Data Collection:

- Number of graduates includes total number of students enrolled in the specified cohort and number of students graduating with that cohort who had a delay in the program.

Job placement rate is defined as the number of graduates employed in the nuclear medicine technology within 6 months of graduation. The number of graduates includes total number of students enrolled in the specified cohort and number of students graduating with that cohort who had a delay in the program.

Nuclear Medicine Technology Program

- 'Continuing Formal Education' refers to graduates who do not work in nuclear medicine but continue in a formal educational program after graduation, such as medical school.
- Graduates do not appear in more than one shaded column. Graduates are placed in the category in which the graduate spends the greater amount of time.

Job placement rate is defined as the number of graduates employed in the nuclear medicine technology within 6 months of graduation. The number of graduates includes total number of students enrolled in the specified cohort and number of students graduating with that cohort who had a delay in the program.
