St. Jude Research Hospital	262 Danny Thomas Memphis, TN 38105

MLS students will not be substituted for regular staff while on the clinical rotation. After demonstrating proficiency, students, with qualified supervision, may be permitted to perform procedures. Service work in clinical settings outside of academic hours is not compulsory.

Dates of applied clinical experience cannot be guaranteed. In the event that the number of students eligible for clinical assignment exceeds the number of sites available, students will be assigned according to GPA in the MLS courses, with the highest GPA receiving priority. Any student not assigned will be guaranteed completion of the program by the end of the calendar year in which he/she was eligible for the clinical assignment.
